

Why Cloud Computing?

1. Large-Scale Data-Intensive Applications
2. Flexibility:
 - Any Software platform allowed
 - Resources from any machine (connected to internet) can be accessed.
 - Infrastructure can be deployed from anywhere at any time.
3. Scalability:
 -
4. Customized to current needs:
 - Hardware
 - Software
5. Effective in Cost Reduction
 - Reduce Maintenance
 - High Utilization
 - High Availability
 - Reduced Carbon Footprint
